**Position:** Senior Software Engineer - (Job No. 4806)  
**Type:** Contract – Hybrid (2 days from office + 3 days from home)  
**Location:** Gothenburg, Sweden | **Language:** English (Mandatory)  
**Duration:** 6 Months + potential extensions | **Start:** ASAP  
**Rate:** Flexible / Competitive all-inclusive daily rate is queried with CV

### Job Description

- Our client is looking for an experienced Software Engineer (minimum 6 years working experience) with a broad documented background developing and implementing solutions based upon our customers platform DCSP.
- Drive software development during all product development phases (planning, design, implementation, deployment, and maintenance). Analyse, build, test and maintain software applications that are tailored to business specific needs.

### Competence Profile & Qualifications:

- To be able to deliver on promise, which is one of our core values at VGCS, you MUST be skilled in typescript and javascript in NODE.js. Experience from deliveries in Azure environment is crucial.
- You need to understand how PRISMA is used as a tool together with PostgreSQL as a database. Depending on where you are leaning your specialist skills to, e.g., either frontend or backend, you must have knowledge about NEST.js and/or React. We are using Azure for both hosting and DevOps, thus you need experience from this.
- We are using Azure event bus for all message handling and integrations, so it is a requirement that you have experience from this. Writing software algorithms for authentication, based on JWS, are very appreciated. This role needs niched competence to be able to support the teams and deliver on epics.
- A good match for this position, is not necessary several years of experience of the programming language, but rather your insight in the North Star platform together with programming experience in Azure environment as described. You have documented training for developing software in the VCE Azure platform

### Development stack:

Programming language: NodeJS (TypeScript): Our client's main language for development.

### Framework:

- NestJS: Used for backend development.
- React: Used for frontend development.

t: +44(0)203 239 6500 | e: [candidates@frs-online.com](mailto:candidates@frs-online.com) | w: <https://FRS-online.com>

### **Tools:**

- Prisma: An ORM tool that we use together with PostgreSQL.
- GraphQL: Used to create and consume APIs.
- Azure Event Bus: An important tool we use for messaging and integration.
- JWT: Used for authentication and security.
- Storybook: Used for frontend documentation and UI component management.

Databases: PostgreSQL: Our main database.

### **Hosting & DevOps:**

- Azure: We use Azure for both hosting and DevOps.
- Git in Azure DevOps: Used for version control.
- CI/CD in Azure DevOps: Used for continuous integration and delivery.

Development methodology: Storyboard Driven Development: Our method for driving the development process.

### **Qualifications for the role as a Developer, Senior:**

- Good knowledge of TypeScript and JavaScript.
- Key Skills: Node.js, React.js, Azure DevOps, PostgreSQL.
- Experience with NestJS for backend and React for frontend.
- Understanding of GraphQL.
- Experience of Prisma with PostgreSQL.
- Knowledge of Azure, especially Event Bus and DevOps.
- Understanding of JWT based authentication.
- Experience with Storyboard Driven Development and using Storybook for frontend documentation.
- Location: Gothenburg, Sweden (2 days / onsite / week)
- Must have existing eligibility to work in location based on having either a Type 1 Visa, EU BlueCard, Dependent Visa, Permanent Residency or Highly preferred EU citizenship
- Must be living in Gothenberg, Sweden or willing to be based there due to being onsite 2 days in a week.
- Must be eligible to work as a Contractor via their limited company without need for sponsorship support, which is not available.
