Role: Technical Transition & Transformation Manager/BFSI Domain (12+ Yrs Exp)

Location: UK (London location advantageous)

Type: Permanent

Start: As Soon As Possible / Immediate Availability preferred

Employer: Multi-National Consultancy

Salary: Dependent on Experience

Job Ref: 5156

Role Overview

We are looking for a Technical Transition & Transformation Manager / BFSI Domain Consultant with strong BFSI domain expertise to lead and support service transition and transformation engagements for global banking, financial services, and insurance clients.

This role is consulting-led and domain-driven, requiring a strong understanding of financial systems, business processes, and operating models, along with the ability to drive transition planning, stakeholder alignment, and service onboarding.

You will act as a bridge between business, operations, and technology teams, ensuring smooth transition of services while aligning with regulatory, operational, and client-specific requirements.

Important Notes :

- We need a technical Transition manager who can solution onsite.
- We need technical brain when we go to client meetings and participate in technical conversations.
- The ideal candidate should be able to understand the technical problem statement being discussed and help to build a solution or propose the same during those conversations.
- Also, the ideal candidate should be able to work with sales/Delivery teams to get the project executed successfully by acting as a bridge between us and our client.
- **Profiles with a career progression from Developer → Technical Program Manager → Technical Transition Manager are preferred.**

Key Responsibilities

Transition & Transformation Leadership

Lead end-to-end service transition programs from client/incumbent teams to internal delivery units.

Define transition strategies, governance frameworks, and execution roadmaps

t: +44(0)7399 575 082 | e: candidates@frs-online.com | w: <https://FRS-online.com>

Drive knowledge transfer, service readiness, and operational acceptance

Oversee cutover planning and stabilisation (hyper care phase)

Identify and mitigate transition risks, dependencies, and business impacts
