

Role: Alveo (Asset Control) Developer – Financial Data Management
Location: London, UK
Type: Permanent
Start: As Soon As Possible / Immediate Availability preferred
Employer: Multi-National Consultancy
Salary: Dependent on Experience
Job Ref: 5162

Overview

We are seeking an experienced Alveo (Asset Control) Developer to join a high-performing Market Data Services team supporting a leading financial services client in London. This role offers the opportunity to work on enterprise-wide market and reference data platforms, delivering critical data management solutions across front-office, risk, operations, and regulatory functions.

The successful candidate will possess strong expertise across the Alveo (formerly Asset Control) product suite, financial data management processes, and Unix/Linux-based environments. You will work closely with business stakeholders, data analysts, developers, and infrastructure teams to enhance and support strategic market data platforms.

Key Responsibilities

- Design, develop, configure, and support solutions across the Alveo product suite, including:
 - Formula Engine
 - IECL
 - Data Normalisation
 - Consolidation
 - Price Consolidation
 - AC Prime
 - AC Desktop Clients
- Implement and maintain data ingestion, transformation, validation, normalisation, and distribution processes for market and reference data.

- Develop, maintain, and optimise automation scripts using Bash and Perl to support operational processes and platform stability.
- Collaborate with business and technology teams to deliver enhancements, resolve production issues, and improve data quality across the platform.
- Perform troubleshooting, root cause analysis, and performance tuning of Alveo applications and associated infrastructure.
- Manage source code and deployment activities using Git/Bitbucket and support delivery processes through Bamboo and JIRA.
- Participate in platform upgrades, releases, environment management, and technical documentation.
- Ensure compliance with internal governance, security standards, and change management processes.
- Contribute to continuous improvement initiatives across market data operations and technology services.

Required Skills & Experience

- Proven experience working with Alveo (Asset Control) solutions within financial services environments.
- Strong hands-on expertise with:
 - Formula Engine
 - IECL
 - Data Normalisation
 - Consolidation
 - AC Prime
- Solid understanding of market data and reference data management principles.
- Strong experience working within Unix/Linux environments.
- Proficiency with version control and development lifecycle tools, including the following:

- Git
- Bitbucket
- Bamboo
- JIRA
- Advanced scripting skills using:
 - Bash
 - Perl
- Excellent analytical, troubleshooting, and problem-solving capabilities.
- Strong communication skills with the ability to engage effectively with both technical and non-technical stakeholders.

Desirable Skills

- Experience with OPS360 and other emerging Alveo products.
- Knowledge of Cronacle Scheduler or similar enterprise scheduling platforms.
- Development experience using:
 - Java
 - Spring Boot
 - SQL
- Experience working within investment banking, asset management, capital markets, or financial data vendor environments.
- Familiarity with cloud technologies and modern DevOps practices.

Qualifications

- Bachelor's degree or equivalent qualification in Computer Science, Information Technology, Engineering, or a related discipline.
- Demonstrable experience delivering Alveo/Asset Control solutions within enterprise financial services environments.

- Experience working in agile delivery teams and complex, business-critical production environments.

What We Offer

- Opportunity to work with a leading global financial institution.
- Exposure to strategic market data and reference data initiatives.
- Collaborative and inclusive working environment.
- Competitive salary.
- Hybrid working model based in London.
- Career development and professional growth opportunities within a MNC.
